DETAILED ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2616.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 11 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,654,541. Although the conflicting claims are not identical, they are not patentably distinct from each other because {see below}.

Claim 11 {encoding method}, of this application 10/751,476, recites all the elements of the recited data structure as recited in Patented claim 1 {a data structure claim}

Page 3

Application/Control Number: 10/751,476

Art Unit: 2616

but, application claim 11, as recited is the encoding method which is the method for generating the data structure as claimed in claim 1.

Therefore, the data structure claim fails to recite the elements of encoding such as:

- {A} Encoding to generate the data structure;
- {B} multiplexing the display cycle ID in the bit stream, in each header of the video sequence including a plurality of video frames.

The examiner takes official notice that the method of encoding thereby performing multiplexing, to create the interleaved data structure, is an obvious method of encoding to create the data structure of claim 1 of the patent.

Therefore, it would have been obvious to those skilled in the art at the time of the invention that in the process of creating an interleaved data structure as recited, is obvious that the data structure can be created by an encoding method including multiplexing to create the recited data structure, therefore, obvious to recite or to perform multiplexing to create the data structure, therefore, the claims data structure claim 1, is determined to be obvious over the method of encoding including multiplexing to create the recited data structure as claimed in claim 11.

Furthermore, since Terminals Disclaimers have already been filed between these related Patents {below} and wherein in this action there exists no prior art rejection,

- {1} US 6,671,456, Nishi et al., {Patent Dated, 03/16/04};
- {2} US 6,671,456, Nishi et al., {Patent Dated, 12/30/03};
- {3} US 6,654,541, Nishi et al., {Patent Dated, 11/25/03};
- (4) US 6,654,545, Nishi et al., {Patent Dated, 11/25/03}; and
- (5) US 6,549,724, Nishi et al., (Patent Dated, 04/15/03);

and due to the claims already being established as obvious variation in claim language in view of the terminal disclaimers already filed by applicant,

o upon the determination that a T.D. will be filed based on the Obvious Double Patenting as stated above, terminally disclaiming against all patents identified by the examiner, is also required. Application/Control Number: 10/751,476

Art Unit: 2616

Allowance of claim 11, of the instant application would result in a time-wise extension of the monopoly previously granted for the invention defined by patent claims for all the patented claims identified, therefore, obviousness type double patenting is deemed proper.

Contact Fax Information

Any response to this action should be mailed to: Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for formal communication intended for entry)

or:

(703) 308-5359, (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA., Sixth Floor (Receptionist).

Contact Information

Any inquiry concerning this communication or earlier communications should be directed to the examiner of record, Monday-Thursday, 8:00 AM to 5:00 PM Vincent F. Boccio (703) 306-3022.

Any inquiry of a general nature or relating to the status of this application should be directed to Customer Service (703) 306-0377.
